Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the closest prior art references of record are the patent to Lucas et al. (6,754,884) and the publication to Lee et al. (2002/0120719). However, neither is considered to teach or suggest the features of claims 1 and 5 of processing an operator to iteratively identify one or more elements selected from a data representative language value for which a test condition expression is satisfied, the features of claims 9, 13 and 42 of processing an expression including an unnamed parent element as an XML document fragment, if it is determined that one or more definitional statements comprise an expression including one or more named child elements embedded within an unnamed parent element, the features of claims 17, 22 and 43 of determining whether an operator will result in one or more data representative language values that do not conform with constraints specified by data type description and generating one or more error messages identifying the operator as generating results that do not conform with constraints specified by the data type, the feature of claims 27, 31, and 44 of determining whether the one or more definitional statements comprises an expression including an operator having a left operand and a right operand, wherein the left operand comprises one of an IDREF and IDREFS attribute and processing the expression to identify zero or more elements containing an id attribute whose value is equivalent to that of the IDREF or IDREFS attributes, or the features of claims 35 and 38 of determining whether one or more definitional statements include a statement designed to indicate the logic of a function is expressed using a second programming

language from within a first programming language and processing the one or more definitional statements to pass at least a name and body of the function to be evaluated in association with the second programming language.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
